

## **210 Flight Operations**

**Flight Operations is responsible for the management of CAP aircraft and aircrews at the squadron level. It requires a thorough understanding of the flight management policies and procedures of the CAP. These include the specific limitations as to who may fly or ride in CAP aircraft, how CAP aircraft may be flown, safety of flight operations, and the administrative procedures that govern the flight operations. Flight Operations must be familiar with Federal Aviation Regulations Parts 61 and 91, the Wings flight management policies, and CAP directives especially CAPR 60-1. Flight Operations in coordination with the Aircrew Training Officer establishes and executes a continuing training program to include but not limited to initial training plus followup for specific flight manual changes, review of the Federal Aviation Regulations, flight operations administrative policies and procedures, aircraft flight operations, local operating procedures, safety, etc.**

**Flight Operations maintains the MIMS file for aircrew qualifications and assists aircrew members in the use of the system. Flight Operations assures all pilots understand and utilize the Flight Schedule Pro and WMIRS online systems.**
